

**Species at Risk Known to Occur on Thetis Island as of November 2015**

| <i>Scientific name</i>                              | <b>Common Name</b>                         | <b>Provincial listing</b> | <b>Federal listing</b> |
|---|--|---------------------------|------------------------|
| <b>Lichens</b>                                      |  |                           |                        |
| <i>Fuscopannaria pacifica</i>                       | Silver-rimmed Crackers Lichen <sup>M</sup> | Blue                      | Not ranked             |
| <i>Leptogium polycarpum</i>                         | Peacock Vinyl Lichen                       | Red                       | Special Concern**      |
| <b>Plants</b>                                       |  |                           |                        |
| <i>Corallorhiza maculata</i> var. <i>ozettensis</i> | Ozette Coral Root                          | Red                       | Not ranked             |
| <i>Marah oregana</i>                                | Coast Manroot                              | Red                       | Endangered**           |
| <b>Invertebrates</b>                                |  |                           |                        |
| <i>Monadenia fidelis</i>                            | Pacific Sideband Snail                     | Blue                      | Not ranked             |
| <i>Nearctula</i> sp. 1                              | Threaded Vertigo Snail                     | Red                       | Special Concern        |
| <b>Birds</b>  |  |                           |                        |
| <i>Progne subis</i>                                 | Purple Martin                              | Blue                      | Not ranked             |
| <i>Chordeiles minor</i>                             | Common Nighthawk                           | Yellow                    | Threatened             |
| <i>Contopus cooperi</i>                             | Olive-sided Flycatcher                     | Blue                      | Threatened             |
| <i>Ardea herodias fannini</i>                       | Great Blue Heron (coastal subspecies)      | Blue                      | Special Concern        |
| <i>Columba flavirostris</i>                         | Band-tailed Pigeon                         | Blue                      | Special Concern        |
| <i>Brachyramphus marmoratus</i>                     | Marbled Murrelet                           | Blue                      | Threatened             |
| <i>Falco peregrinus</i>                             | Peregrine Falcon                           | Red                       | Special Concern        |
| <i>Hirundo rustica</i>                              | Barn Swallow                               | Blue                      | Threatened **          |
| <i>Megascops kennicottii</i>                        | Western Screech Owl (not confirmed)        | Blue                      | Threatened             |
| <b>Amphibians</b>                                   |  |                           |                        |
| <i>Rana aurora</i>                                  | Northern Red-legged Frog                   | Blue                      | Special Concern        |
| <b>Mammals</b>                                      |  |                           |                        |
| <i>Corynorhinus townsendii</i>                      | Townsend's Big-eared Bat                   | Blue                      | Not ranked             |
| <i>Myotis lucifugus</i>                             | Little Brown Myotis                        | Yellow                    | Endangered             |

Provincial listing: In B.C., species and ecological communities are assigned to one of three lists, based on their provincial Conservation Status Rank. Red-listed species and ecological communities are Extirpated, Endangered, or Threatened in British Columbia. Blue-listed species and ecological communities are of Special Concern (formerly Vulnerable) and Yellow-listed species and ecological communities are secure.
